keyTec ON-tra+

The sophisticated turn key system for self assembly – now also for locking systems!

Ready to tackle any task

After many partners have already become familiar with the advantages of the ON-tra+ series for individually secured cylinders (EGS) in 2020, it is now also available for central cylinder systems and master key and grant master key locking systems from 4 January 2021. Now your customers can also enjoy this high-quality turn key system in the field of locking systems. It is not only compelling due to the well-known serial drilling and picking protection, the individual security card as well as the marking on the nickel silver key: thanks to the Winkhaus AZE Protection it boasts another technical security element. The extra enquiry unit in the cylinder in combination with the additional element fitted in the key offers extra security and flexibility, providing effective protection against key duplication and manipulation. Wherever areas need to be locked easily and securely, the keyTec ON-tra+ system comes into its own. Whether in private homes, residential buildings or complex buildings – also due to the extended variety of cylinder types, ON-tra+ is always a good solution for your customers.

keyTec ON-tra+ meets all requirements

- 6 spring-mounted massive pin tumblers on each side
- Additionally up to 14 springlessly-controlled locking pins
- Technical copy protection
- Drilling and picking protection due to special pins
- Manipulation protection due to catch pin function
- Extended protection against opening by unauthorised keys thanks to pin tumblers, lateral pins and catch pin on 3 locking levels
- Patent protection
- Optimum security thanks to AZE Protection enquiry unit
- First-quality, ergonomical key, extended design for modern protective fittings
- Rounded key tip (gentle on trousers and handbags)

Security equipment

Also for the ON-tra+ series you have the possibility to further increase the safety standard of the cylinders with selected drilling and pulling protection options.

Cylinder types

keyTec ON-tra+ is available for the cylinder type range known from the keyTec ON-tra system. This applies to individually-secured cylinders (EGS) including a security card and to central cylinder locking systems and (grant) master key systems.

Imprint on key

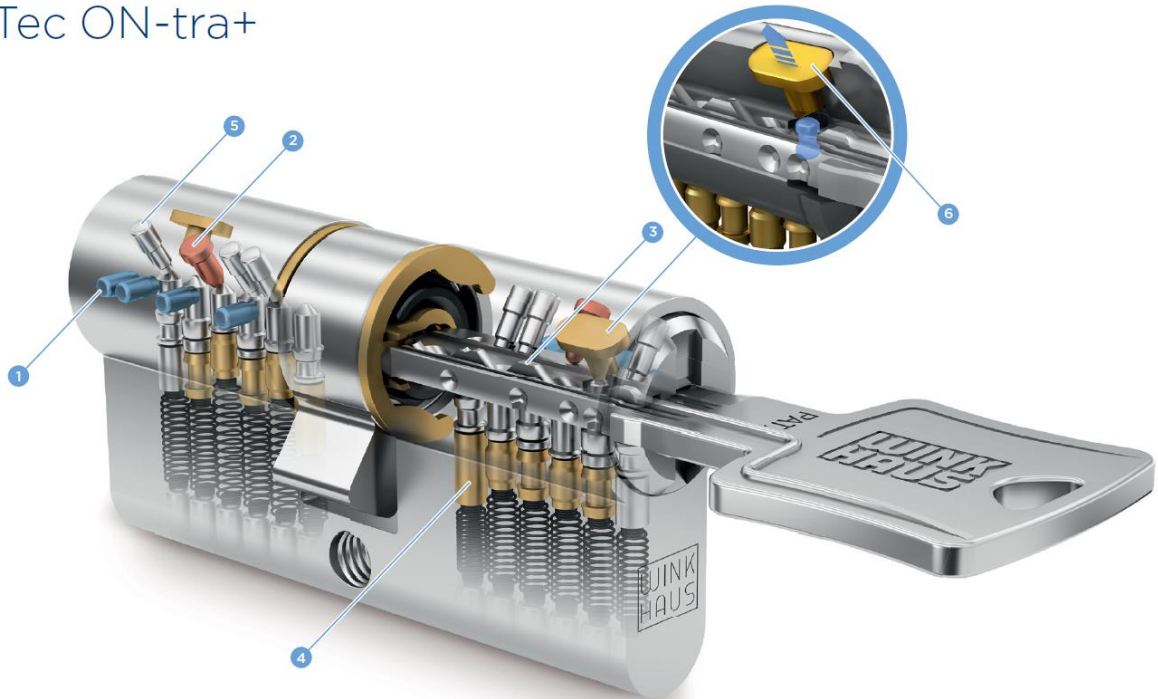

The convenient reversible key -whether supplied as a blank or ready for use including the cuts- can bear your company logo or contact data, depending on what you request.

Advantages due to customer-specific profile agreement

As a contractual partner you enjoy various service advantages. You can order keys and key blanks, assembled cylinders or individual parts with Winkhaus. The suitable accessories can be selected individually. They include pinning tools matched to the system for easy do-it-yourself assembly. Further aids, such as assembly instructions and ready-made ordering lists for individual parts, are provided to assist you.

Your Winkhaus sales staff will be glad to give you advice on your new partner profile series or the extension of your existing one.
